**Policy Document on Green Campus, Environment issues & Energy Usage for BMIT BMIT  
Belati Campus**

In view of Maintaining Pollution free green campus, conducive environment in the campus and to minimize the energy usage of the campus all the members including students (day scholars and hostellers) teaching and non-teaching staff staying in the campus, different vendors such as owner of mess, canteen, and other facilitators are informed to adhere the following guidelines:

1. As to maintain the cleanliness and greenery in the campus and to make it as plastic free campus everyone is required to take care of following points.
  - a) Do not through the garbage's, plastic wrappers and bottle anywhere in the campus instead put them in the dustbins placed at various places.
  - b) Do not spit; chew tobacco and smoke inside the campus as it is strictly prohibited in the campus.
  - c) Do not touch to any of the tree /plant and maintain sufficient distance from them
  - d) Management has taken good efforts to increase the vegetation inside the campus in spite of shortage of water. Therefore, always respect these initiatives.
  - e) Do not ride the vehicles with over speed and maintain the diversions and follow the traffic rules in the campus.
2. As water is essential but limited resource and since Solapur is drought prone region the water scarcity is increasing day by day and also to uniform you that the institute is paying very exorbitant amount for making availability of water. Hence it is obligatory for all of us to use water very judiciously. Therefore, following points need to be taken care.
  - a) Close the water taps after the use.
  - b) Do not flush the tanks if it is not required to do so.
  - c) Inform to the concerned staff regarding wastage /leakage of water.
  - d) Maintain hygiene and cleanliness near the water taps.
  - e) Ensure all water taps are closed before leaving the office/room.
